The Honorable Dan Burton, Chairman
House Government Reform and Oversight Committee
c/o Milt Copulos/Beth Clay
Room 2157 RHOB
Washington, DC 20515

Dear Congressman Burton,

The FDA seems bent on implementing the flawed and obviously corrupt Codex standards on dietary supplements based on NAS document titled a "Risk Assessment Model for Establishing Upper Limits for Nutrients".

Perhaps Dr. Yetley should devote her time to cleaning up the entrenched Medical and Drug industry. Bear in mind, Doctors are the 3rd leading cause of death in America.

Drugs cause hundreds of thousands of serious injuries and deaths yearly.

Millions of unnecessary operations are performed yearly. One out of 20 diagnosis's is wrong.

Medical creative price gouging in legend.

Is there any wonder almost half of all Americans choose alternate or complimentary care to insure good health or a return thereto.

Do not let corrupt big government destroy our Health.

Remember, this used to be the Land of the Free!

Sincerely,

Ralph M. Eisenmann
